**Reference:** Regulation 30 of the Securities and Exchange Board of India (Listing Obligations and Disclosure Requirements) Regulations, 2015

**Subject:** Update on commissioning of third phase of 75 MW out of 300 MW solar power project in Rajasthan by wholly owned subsidiary of ACME Solar Holdings Limited

Dear Sir/Madam,

In continuation of our earlier intimation dated May 09, 2025 and May 19, 2025, regarding commissioning of Phase-I (52.5 MW) and Phase-II (112.5 MW) of the 300 MW solar power project at Bikaner, Rajasthan, we wish to inform you that the Company's wholly owned subsidiary, ACME Sikar Solar Private Limited, has now commissioned Phase-III of 75 MW of the said project on June 09, 2025. With this ACME Sikar Solar Private Limited has achieved a commissioned capacity of 240 MW out of 300 MW and the balance capacity is under commissioning.

With this, the total operational renewable energy capacity of the Company has increased to 2,806.4 MW.

The press release in this regard is attached.

You are requested to take the same on your records.

Thanking you,

For **ACME Solar Holdings Limited**

## **ACME Solar commissions 75 MW additional capacity at Sikar Solar project in Rajasthan**

**GURUGRAM - JUNE 10, 2025:** ACME Solar Holdings Limited has commissioned 75 MW of additional renewable energy capacity at the ACME Sikar Solar project in Rajasthan. This follows the earlier commissioning of 165 MW at the same project, taking the total commissioned capacity of the project to 240 MW out of a planned 300 MW. With this milestone, ACME Solar Holdings' total operational capacity has increased to 2806.4 MW.

The ACME Sikar Solar power project is spread across ~1300 acres in Bikaner, Rajasthan and strategically located in one of India's highest solar irradiation zones. This geographical advantage empowers ACME Solar to be an important long-term contributor to India's renewable energy goals.

The renewable energy harnessed through the ACME Sikar Solar project is pooled at inverter stations and stepped up for evacuation to Bikaner-II grid using a dedicated single circuit 220 kV transmission line. The debt of the project is financed by PFC Limited and expected to generate approximately 780 million units of clean energy annually following its full commissioning.

The project is envisaged to be allocated to 300 MW solar power project which ACME Solar had won earlier under SECI-ISTS XVIII scheme at a tariff of INR 3.05 per unit for which the tariff has been adopted & Power Purchase Agreement (PPA) is expected to be signed soon. In the interim, power generated from the commissioned capacity will be sold on power exchanges on merchant tariffs.

**About ACME Solar Holdings:** ACME Solar Holdings is a leading integrated renewable energy player with a diversified portfolio of 6,970 MW spanning solar, wind, FDRE and hybrid solutions. With this commissioning, the operational capacity of ACME Solar stands at 2806.4 MW with another 4,163.6 MW in various stages of implementation. With an in-house EPC and O&M division, the company does end-to-end development and O&M of the plants, thereby delivering projects in a time & cost-effective manner while ensuring best in class operating performance evident in its industry leading CUF and operating margins.
